

(On macOS Big Sur, macOS Catalina) [Allow access to files and folders] for rekordbox.

Q

After updating to macOS Big Sur or macOS Catalina, I can no longer play music files shown on the track list of rekordbox.

A

On macOS Big Sur and macOS Catalina, app cannot access folders to which they have not been allowed access.

If music files on the track list of rekordbox are indicated as non-playable, or external devices are no longer displayed in [Devices] of TreeView, open [System Preferences] > [Security & Privacy] > [Privacy]tab > [Files and Folders] on Mac and checkmark all the rekordbox items.
